

Paper PDF available after publication

What Does Anatomical Shape Know About You? A Multi-Organ, Shape-Only Study of Demographic Prediction, Attribution, and Privacy

Gijs Luijten, Behrus Hinrichs-Puladi, Merlin Engelke, Christian Wachinger, Jan Egger
ShapeMI workshop, MICCAI 2026

This repository does not host the paper PDF yet, and that is deliberate.

The work has been accepted and the camera-ready version has been submitted. Publication is handled under a Springer Nature licence to publish, which governs where and when each version of a contribution may be made publicly available. Under that licence the accepted manuscript may be posted on an institutional repository only after an embargo period following first publication, and never under a Creative Commons or other open-access licence. We would rather respect that agreement than post the file early.

What is available here right now. Everything needed to reproduce the work: the complete pipeline, the experiment outputs, and the figures and tables of the paper, all generated by the code in this repository. No number in the paper is hand-entered.

What happens next. As soon as the proceedings appear, this placeholder will be replaced by a link to the published version of record (DOI), and by the permitted version of the manuscript once the licence allows it.

If you need the paper before then, please write to gijs.luijten@uk-essen.de and we will gladly share a copy for personal, scholarly use.
